

## **A-1505**

### **Water Base Efflorescence Blocker**

### **“Stop the Salt”**

**WATER BASE      STOPS EFFLORESCENCE      EASY TO APPLY**  
**EASY CLEAN UP      VOC COMPLIANT**  
**ENVIRONMENTALY FRIENDLY**

#### **Product Description**

**A-1505 Efflorescence Blocker** is a water base proprietary chemical, formulated to create a barrier against white efflorescence. Two coats are required. **A-1000 Concrete Stain** can be applied over **A-1505** to create a beautiful stained concrete that won't delaminate. **A-1505** is ideal for a primer coat before applying epoxies.

**Product cleans up easily with soap and water.**

#### **Uses**

Americrete **A-1505 Water Base Efflorescence Blocker** can be used over stamped concrete, rock, walls, block, brick, stucco, tile and any porous concrete substrate.

#### **Application Rate**

200-300 square feet per gallon.

#### **Application**

**A-1505 Water Base Efflorescence Blocker** can be applied over a clean, porous, non-sealed surface. Apply **A-1505** with a garden sprayer or similar sprayer. Two coats are required. Americrete stains and sealers can be applied over **A-1505**. Efflorescence Blocker can also be applied with a broom or roller.
